Profile

Final-year Computer Science student combining a strong foundation in software engineering with specialized expertise in game development. Proven ability to drive creative technical projects from ideation to deployment.

Education

University of Indonesia - Depok, Indonesia Jul 2022 - Jul 2026
GPA 3.93; Undergraduate, Major in Computer Science

Nanyang Technological University - Singapore Jul 2025
GPA 4.0/5.0; INSPIRASI-NTU Summer Program, Sustainability Studies

Honors & Awards

Finalist (Top 20) of Gemastik Game Development 2024 Sept 2024
- Led a 3-person team as Project Manager & Programmer to build a 3D educational game using Godot, Blender, and Figma.

Provincial-Level Participant, National Science Olympiad (OSN) – Mathematics 2021

Experience

Teaching Assistant of Game Development - Faculty of Computer Science, University of Indonesia Jan 2025 - July 2025
- Refactored the Godot tutorial codebase to align with modern updates and industry best practices.
- Mentored students by providing technical guidance and troubleshooting gameplay issues.
- Graded weekly assignments to ensure adherence to academic submission standards.

Game Programmer Intern - Ikadev Studio Jan 2025 - April 2025
- Developed a dynamic pronoun system and integrated animated Spline2D characters into Godot.
- Optimized performance and memory through UI Object Pooling and built custom debug tools for rapid state testing.
- Collaborated with the narrative team using GitHub and Miro to align technical and design implementation.

Vice Director of Game Development SIG - Ristek Fasilkom UI Feb 2024 - Jan 2025
- Directed talent acquisition and conducted technical interviews to select top programmer candidates.
- Designed and instructed intensive internal Godot Engine classes, onboarding new members into modern workflows.
- Engineered two complete game titles, including the Gemastik national finalist Doni's Adventure With MAS.

Member Programmer of Game Development SIG - Ristek Fasilkom UI Feb 2023 - Dec 2023
- Awarded "Best Member" for 2 consecutive quarters (Q1 & Q2) in recognition of technical contributions and team impact.
- Developed and shipped four diverse Unity C# games across collaborative and competitive tracks.
- Co-organized Ristek Game Jam 2023, a university-wide competition to foster the campus game development ecosystem.
- Delivered a Unity C# Masterclass to mentor shortlisted participants in core game programming principles.

Project

SafetyPin — Proximity-Based Crime Reporting & Tracking Mobile App | Team of 6 Jan 2025 - July 2025
- Received the "Never Give Up" Award for demonstrating exceptional resilience in overcoming technical challenges, leading architectural pivots, and ensuring the delivery of a functional MVP.
- Served as Scrum Master, leading weekly stand-ups and coordinating project progress using Notion and Trello.
- Developed backend services with Spring Boot and PostgreSQL/PostGIS, handling proximity-based geospatial data.
- Built the project landing page using HTML and CSS.

Skills

Programming: C, C++, C#, Python, Java, JavaScript/TypeScript, GDScript, PostgreSQL
Technologies & Tools: Godot, Unity, PyTorch, Django, Spring Boot, Node.js, AWS, GCP, PostgreSQL, Raylib, Blender, Figma
Languages: Indonesian (Native), English (Fluent), Mandarin (Novice)
